

Hey guys!!! I hope you are doing okay and staying safe. The “projects” that I am going to assign you guys are easy and can all be done at home. If you guys have questions, please email me : aogle87@gmail.com or you can reach out on Instagram (I made your class and Instagram page : @BCS_Art_class

Project 1:

We already have talked about colors. Think back to the boxes we glued together and painted.

Red, **Yellow**, and **Blue** are called “**primary colors**” because they 1) can’t be created with any combinations of colors and 2) They are the basic colors you need to create other colors.

Orange, **Green** and **Purple** are called “**secondary colors**” because you have to mix 2 primary colors together.

The colors in between primary and secondary colors are known as “**Tertiary (or Intermediate) Colors**”. There 6 tertiary colors (**red-orange, yellow-orange, yellow-green, blue-green, blue-violet, red-violet**).

Color wheel order:

Household object color wheel - go on a scavenger hunt around your house and collect colorful everyday objects that you arrange in a circle, creating an accurate color wheel. Use as many objects as you can find, and make sure you arrange them in the correct order (use the provided example of a color wheel). Take a photo and send it to me: aogle87@gmail.com or send it to me on the Instagram I made for you guys [@BCS_Art_class](https://www.instagram.com/BCS_Art_class). Put everything away when you are done; don't leave a mess for someone else!!

Here are some examples so you understand what I am asking you to do.
